
Log Likelihood $\log \mathcal{L}_{\tilde{\Theta}}$ conditioned on β
Log likelihood
Discount factor (β)
Log Likelihood $\log \mathcal{L}_{\tilde{\Theta}}$ conditioned on σ
Relative risk aversion (σ)
Log Likelihood $\log \mathcal{L}_{\tilde{\Theta}}$ conditioned on η
Log likelihood
Inverse Frisch elasticity (η)
Log Likelihood $\log \mathcal{L}_{\tilde{\Theta}}$ conditioned on ϕ
Price duration (ϕ)
Log Likelihood $\log \mathcal{L}_{\tilde{\Theta}}$ conditioned on ρ_I
Log likelihood
Interest-rate persistence (ρ_I)
Log Likelihood $\log \mathcal{L}_{\tilde{\Theta}}$ conditioned on ρ_A
Persistence shock (ρ_A)
Log Likelihood $\log \mathcal{L}_{\tilde{\Theta}}$ conditioned on σ_A
Log likelihood
Standard deviation shock (σ_A)
Log Likelihood $\log \mathcal{L}_{\tilde{\Theta}}$ conditioned on σ_{MP}
Monetary shock volatility (σ_{MP})
Neural Network
Particle Filter
True value
